8. Extreme caution must be used when moving an appliance containing hot oil or other hot liquid.
9. Do not place on or near a hot gas or electrical burner, or in a heated oven.
10. Turn all controls to "OFF" before inserting or removing plug from wall outlet.
11. Do not place any flammable materials in the oven: paper, cardboard, plastic, etc.
12. To disconnect, grasp plug and remove from outlet. Do not pull by the cord.
13. Do not use oven for other than intended use.
14. Oversized foods or utensils must not be inserted in this appliance, as they may create a fire or risk of electric shock.
15. A fire may occur if this appliance is covered by or touches flammable material including curtains, draperies, walls, etc. when in operation. Do not store any item on top of the appliance.
16. Do not store any material, other than manufacturer's recommended accessories, in this oven when not in use.
17. Do not clean with metal scouring pads. Pieces can break off the pad and touch electrical parts resulting in a risk of electric shock.
18. Extreme caution should be used when using containers constructed of other than metal or oven safe glass.
19. Do not cover crumb tray or any parts of the oven with metal foil. This will cause overheating of the oven.

If this product is mounted under a cabinet:

20. To reduce the risk of fire, do not place any heating or cooking appliance beneath the appliance.
 - To reduce the risk of fire, do not mount unit over or near any portion of a heating or cooking appliance.

21. Do not operate the appliance if the power cord or plug is damaged, it must be replaced by the manufacturer or its service agent before use.

Some countertop and table surfaces, such as Corian®, wood and/or laminates, are not designed to withstand prolonged heat generated by certain appliances. It is recommended by countertop manufacturers that a hot pad or trivet be placed under your appliance to prevent possible damage to the surface.

CAUTION: This appliance is equipped with a polarized plug (one blade is wider than the other blade) as a safety feature to reduce the risk of electrical shock. This plug is intended to fit into a polarized outlet only one way. If you are unable to fit the plug into the electrical outlet, try reversing the plug. If the plug still does not fit, contact a qualified electrician. Never use the plug with an extension cord unless the plug can be fully inserted into the extension cord. Do not alter the plug of the product or any extension cord being used with this product. Do not attempt to defeat the safety purpose of the polarized plug.

NOTE: A short power cord is provided to reduce the risk of personal injury resulting from becoming entangled in or tripping over a longer cord.

Longer power-supply cords or extension cords are available and may be used if care is exercised in their use.

If an extension cord is used: (1) the marked electrical rating of the extension cord should be at least as great as the electrical rating of the product; (2) the extension cord should be arranged so that it will not drape over the countertop or tabletop where it can unintentionally be pulled on or tripped over by children or pets.

PLASTICIZER WARNING

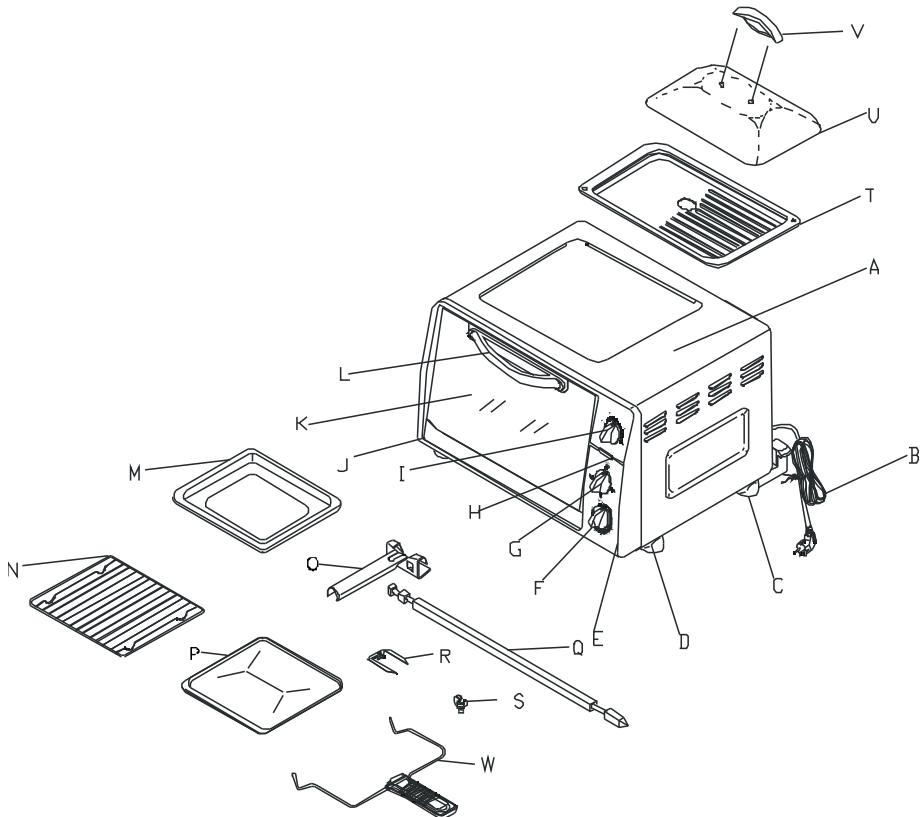

CAUTION: To prevent Plasticizers from migrating from the finish of the counter top or table top or other furniture, place NON-PLASTIC coaster or place mats between the appliance and the finish of the counter top or table top.

Failure to do so may cause the finish to darken. Permanent blemishes may occur or stains can appear.

ROTISSERIE COOKING

We recommend that you do not cook a roast/chicken weighing more than 4-5lbs. on the skewer (Q). Chicken should be bound in food ties/string to prevent chicken legs or wings from unraveling during cooking; and to keep the rotisserie assembly rotating smoothly. For best results, we recommend that you preheat the oven for 15-minutes on 450°F.

OPERATION:

- Set the temperature control knob (I) to 450°F.
- Turn the function control knob (G) to Rotisserie. Insert the pointed end of the skewer clamp (R) through the rotisserie skewer (Q), making sure the points of the skewer clamp (R) faces in the same direction as the pointed end of the rotisserie skewer. Slide the skewer clamp (R) towards the square end of the skewer (Q) and secure with a thumbscrew (S).
- Place food to be cooked onto the rotisserie skewer (Q) by inserted the skewer directly through the center of the food. Push food all the way to the end until the skewer clamp (R) pierces the food to secure.
- Thread the second skewer clamp (R) through the skewer and pierce the food to secure and tighten with second thumbscrew (S).
- Check that the food is centered on the rotisserie skewer.
- Insert the pointed end of the rotisserie skewer (Q) into the drive socket located on the right-hand side of the inside of the oven wall. Make sure the square end of the rotisserie skewer (Q) rests on the skewer support located on the left-hand side of the oven wall.
- Slide the Crumb Tray (P) into the lowest position slot right above the bottom heating element rods to catch food drippings.
- Turn the Timer Control Knob (F) to the "STAY ON" position.
- Use the Rotisserie Guide below for suggested roasting times. Check the doneness with a reliable meat thermometer. Use an independent timer to remind you to check the meat temperature periodically.
- When complete, turn the Timer Control Knob (F) to the "OFF" position.
- Remove the skewer by placing the hooks of the Rotisserie Removal Handle (W) under the grooves on either side of the skewer (Q). Lift the left side of the rotisserie skewer first by lifting it up and out. Then pull the rotisserie skewer out of the drive socket and carefully remove the roast from the oven. Take the meat off of the rotisserie skewer (Q) and place on cutting board or platter.
